

# CAN YOUR NETWORK REALLY HANDLE

All Those Video Conference Calls?

## NETWORK ASSESSMENTS: THE SOLUTION

### IMPROVED

You probably have a good network already. However, it was probably built to offer only a good web experience.

### USER EXPERIENCE

### CAPACITY

### PLANNING

If you perform a Real Time Media Assessment, you'll see how much capacity for video calls you have and how much you need.

### PERFORMANCE AND NETWORK

If you're scaling, you need to ensure there's space for more traffic on your network. An expansion will require a test to ensure that there's room.

### READINESS

### COST AND TIME

### SAVINGS

If your network is ready for your next communication technology phase, it will let IT focus on other issues instead of always checking network quality.
